SUBJECT INDEX

VOLUME 45 (1977)

- Aberrations, chromatid-type, change to chromosome-type, after diethyl sulphate treatment, 205
- , effect of caffeine on mutagen-induced exchanges and, in Chinese hamster cells, 157
- , in mouse dictyate oocytes by X-rays and chemical mutagens, 325
- , X-ray-induced, in spermatocytes of *Drosophila*, 213
- Abnormalities, chromosomal, in lymphocytes from monkeys poisoned with lead, 77
- N*-Acetoxy-2-acetylaminofluorene, in Chinese hamster cells, 263
- 2-Acetylaminofluorene, in Chinese hamster cells, 263
- Acridine orange, cytogenetic assays, using mammalian cells, in culture, 233
- Acrylonitrile, in *E. coli*, 283
- Activation, metabolic, sister chromatid exchanges in Chinese hamster cells by carcinogenic mutagens requiring, 263
- , of promutagens in *Saccharomyces*, cytochrome P-450 and, 309
- Adriamycin, and X-rays, in ataxia telangiectasia patients, 343
- Aflatoxin B₁, in Chinese hamster cells, 263
- , and cytochrome P-450 in *Saccharomyces*, 309
- , and G₁, genetic activity in *E. coli* and *S. cerevisiae*, 7
- Alkylating agents, evaluation of genetic risks, 175
- Alkylation, of haemoglobin, after metabolic conversion of ethene to ethene oxide, 175
- Ametyst, barley, seeds, aberrations by diethyl sulphate, 205
- 2-Aminofluorene, in Chinese hamster cells, 263
- Anaemia, pernicious, cytogenetic findings, 249
- Analysis, cytological, of X-ray-induced aberrations in male *Drosophila*, 213
- Ape, hominoid, chimpanzee, chromosomal radiosensitivity of lymphocytes, 69
- Aspergillus nidulans*, mutations to 2-thioxanthine resistance in inhibitor-depleted conidia, by γ -irradiation, 21
- Assays, cytogenetic, of chemical clastogens, using mammalian cells in culture, 233
- , host-mediated, intrasanguine, with *S. typhimurium*, 291
- , quantitative, at HGPRT locus in Chinese hamster ovary cells, 91, 103
- Ataxia telangiectasia, chemical mutagens and X-rays in blood lymphocytes, 343
- Auxotrophic, strains, of *S. typhimurium*, spontaneous and radiation-induced mutagenesis, 1
- Auxotrophy, of tryptophan, mutation from, in *E. coli*, UV-induced and, DNA polymerase I, 147
- 8-Azaguanine, resistance to, mutagenesis to, in Chinese hamster ovary cells, 271
- , resistant clones, from Chinese hamster cells, mutagenesis by Simian virus 40, 111
- Bacteriophage, lambda, phage yield during Weigle reactivation, 161
- Barley, seeds, aberrations by diethyl sulphate, 205
- Benzo(a)pyrene, in Chinese hamster cells, 263
- Blood, lymphocytes, of patients with ataxia telangiectasia, effects of chemical mutagens and X-rays, 343
- Bone marrow, cells, of mice, dose-response relationship for radiation-induced translocations, 61
- Cadmium chloride, molecular-genetic effects, 169
- Caffeine, effect on aberrations in Chinese hamster cells, 157
- , protective effect on *Drosophila* larvae treated with methyl methanesulphonate, 41

Caffeine, (*continued*)

- , and UV, in xeroderma pigmentosum cells, 253
- , and UV-induced ouabain-resistant Chinese hamster cells, 125
- Carcinogenic, mutagens, requiring metabolic activation, in Chinese hamster cells, 263
- Cells, of Chinese hamster, V79, cultured, effect of tumour-promoting agents on mutation frequencies, 153
- , —, carcinogenic mutagens requiring metabolic activation, 263
- , —, effect of caffeine on mutations, 157
- , —, ouabain-resistant, UV-irradiated, influence of caffeine, 125
- , human, molecular-genetic effects of cadmium chloride, 169
- , mammalian, in culture, cytogenetic assays of chemical clastogens using, 233
- , —, frozen and thawed, inactivation of DNA repair in, 137
- , of ovary, of Chinese hamster, effects of ploidy level on mutagenesis, 271
- , —, —, irradiation with sunlight, sunlamp and fluorescent lights, 333
- , —, —, quantitative assay at HGPRT locus, 91, 103
- , phase, G₁, prolonging of, after treatment with diethyl sulphate, in barley, 205
- , somatic, and of germ, of mice, dose-response relationship for radiation-induced translocations, 61
- , —, mammalian, genetic origin of mutations, 271
- , stages, of germ, of *Drosophila*, production of mosaic lethals by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 31
- , viability, and inactivation of DNA repair in frozen and thawed mammalian cells, 137
- , xeroderma pigmentosum, sister chromatid exchanges after UV, 253
- Chemical, clastogens, cytogenetic assays of, using mammalian cells in culture, 233
- , mutagenesis, to purine analogue resistance in Chinese hamster cells, 271
- , mutagens, and X-rays, in blood lymphocytes, of ataxia telangiectasia patients, 343
- Chimpanzee, chromosomal radiosensitivity of lymphocytes, 69
- Chinese hamster, cells, carcinogenic mutagens requiring metabolic activation, 263
- , —, in culture cytogenetic assays of chemical clastogens, 233
- , —, effect of caffeine on mutations, 157
- , —, mutagenesis by Simian virus 40, 111
- , —, ouabain-resistant, UV-irradiated, influence of caffeine, 125

Chinese hamster, cells, (*continued*)

- , —, of ovary, effects of ploidy level on mutagenesis, 271
- , —, —, irradiation with sunlight, sun lamp and fluorescent lights, 333
- , —, —, quantitative assay at HGPRT locus, 91, 103
- , —, V79, cultured, effect of tumour-promoting agents on mutation frequencies, 153
- CHO/HGPRT, development and definition, 91, 103
- Chromatid-type, aberrations, change to chromosome-type, after diethyl sulphate treatment, 205
- Chromosomal, abnormalities, in lymphocytes from monkeys poisoned with lead, 77
- , radiosensitivity, of lymphocytes from the chimpanzee, 69
- Chromosomes, of rabbit lymphocytes, radiosensitivity, 223
- , studies, and micronucleus test, cytogenetic findings in pernicious anaemia, 249
- Chromosome-type, aberrations, change of chromatid-type to, after diethyl sulphate treatment, 205
- Clastogens, chemical, cytogenetic assays of, using mammalian cells in culture, 233
- Clones, KU 9 and 20, of *Tradescantia*, somatic mutation in stamen hairs after gamma-rays, 195
- Conidia, inhibitor-depleted, of *A. nidulans*, mutations to 2-thioxanthine resistance, by γ -irradiation, 21
- Conjugation, transfer of *polA* gene from *E. coli* to *S. typhimurium*, 351
- Conversion, metabolic, of ethene, to ethene oxide, alkylation of haemoglobin after, 175
- Cricetulus griseus*, ouabain-resistant cells, UV-induced influence of caffeine, 125
- Cultured, Chinese hamster cells, effect of tumour-promoting agents on mutation frequencies, 153
- Cyanoethylene, in *E. coli*, 283
- Cyclophosphamide, and cytochrome P-450 in *Saccharomyces*, 309
- , intrasanguine host-mediated assay, 291
- Cytochrome P-450, and activation of promutagens in *Saccharomyces*, 309
- Cytogenetic, assays, of chemical clastogens, using mammalian cells in culture, 233
- , findings, in pernicious anaemia, 249
- Cytological, analysis, of X-ray-induced aberrations in male *Drosophila*, 213
- Development, of CHO/HGPRT system, 91, 103

- Dictyate, oocytes, of mouse, X-rays and chemical mutagens, 325
- Diethylnitrosamine, intrasanguine host-mediated assay, 291
- Diethyl sulphate, change of chromatid- to chromosome-type aberrations in barley seeds, 205
- , II—III translocations in mature sperm of *Drosophila*, 355
- Dimer excising activity, and inactivation of DNA repair in frozen and thawed mammalian cells, 137
- Dimers, pyrimidine, repair of, in radiation-sensitive mutants of *S. cerevisiae*, 13
- Dimethylaminoazobenzene, intrasanguine host-mediated assay, 291
- Dimethylnitrosamine, in CHO/HGPRT system, 103
- , and cytochrome P-450 in *Saccharomyces*, 309
- Dimethylsulphate, effect of caffeine on mutations in Chinese hamster cells, 157
- Dimethylsulphoxide, and cytochrome P-450 in *Saccharomyces*, 309
- DNA, polymerase I, and UV-induced mutation from tryptophan auxotrophy in *E. coli*, 147
- , repair, inactivation of, in frozen and thawed mammalian cells, 137
- Dose—response, relationship, for radiation-induced translocations in somatic and germ cells of mice, 61
- Down, syndromes, sister chromatid exchanges, 85
- Drosophila melanogaster*, cytological analysis of X-ray-induced aberrations in spermatocytes, 213
- , mosaic lethals in germ cell stages by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 31
- , mutational spectrum of procarbazine, 47
- , protective effect of caffeine on larvae treated with methyl methanesulphonate, 41
- , II—III translocations by diethylsulphate in mature sperm, 355
- Endoxan, intrasanguine host-mediated assay, 291
- Enzymes, HGPRT, mutant, changes in substrate affinities in, at different pH values, SV40 mutagenesis, 111
- Epigenetic, influence, of caffeine, on UV-induced ouabain-resistant Chinese hamster cells, 125
- Escherichia coli*, B/r WP2, DNA polymerase I, and UV-induced mutation from tryptophan auxotrophy, 147
- Escherichia coli*, (continued)
- , comparison of genetic activity of aflatoxins, 7
- , inactivation of DNA repair in frozen and thawed mammalian cells, 137
- , mutagenicity of acrylonitrile, 283
- , transfer of *polA* gene from, to *S. typhimurium*, 351
- Ethene, conversion of, to ethene oxide, alkylation of haemoglobin after, 175
- Ethene oxide, alkylation of haemoglobin after metabolic conversion of ethene to, 175
- Ethyl carbonate, and cytochrome P-450 in *Saccharomyces*, 309
- Ethyl methanesulphonate, in Chinese hamster ovary cells, 271
- , in CHO/HGPRT system, 91, 103
- , effect of caffeine on mutations in Chinese hamster cells, 157
- , intrasanguine host-mediated assay, 291
- , and X-rays, in ataxia telangiectasia patients, 343
- Exchanges, sister chromatid, effect of caffeine on, in Chinese hamster cells, 157
- Excision-defective, strains, UV-sensitive, of *Saccharomyces*, spontaneous mutability, 185
- Fluence, response study, of white, black, and blue fluorescent light, sunlamp, and sunlight irradiation, in Chinese hamster, 333
- Fluorescent light, white, black and blue, sunlamp, and sunlight, in Chinese hamster ovary cells, 333
- Frequencies, of mutation, effect of tumour-promoting agents on, in Chinese hamster cells, 153
- , of somatic mutation, in stamen hairs of *Tradescantia*, after gamma-rays, 195
- Frozen, mammalian cells, and thawed, inactivation of DNA repair, 137
- Ganglia, somatic, of *Drosophila*, cytological analysis of X-ray-induced aberrations, 213
- Gene, *polA*, transfer of, from *E. coli* to *S. typhimurium*, 351
- Genetic, activity, of aflatoxins B₁ and G₁ in *E. coli* and *S. cerevisiae*, 7
- , origin, of mutations in mammalian somatic cells, 271
- , risks, of alkylating agents, evaluations, 175
- Genetic-molecular, effects, of cadmium chloride, 169

- Germ, cells, of mice, dose-response relationship for radiation-induced translocations, 61
- , cell stages, of *Drosophila*, production of mosaic lethals by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 31
- Haemoglobin, alkylation of, after metabolic conversion of ethene to ethene oxide, 175
- Hairs, stamen, of *Tradescantia*, somatic mutation after gamma-rays, 195
- HGPRT, enzymes, mutant, changes in substrate affinities in, at different pH values, SV40 mutagenesis, 111
- , locus, in Chinese hamster ovary cells, quantitative assay, 91, 103
- Histidine, independence, spontaneous mutability in *Saccharomyces*, 185
- Hoechst 33258, cytogenetic assays using mammalian cells in culture, 233
- Host-mediated, intrasanguine, assay, with *S. typhimurium*, 291
- Human, beings, normal, sister chromatid exchanges in Down syndromes and, 85
- , blood, lymphocytes of ataxia telangiectasia patients, effects of chemical mutagens and X-rays, 343
- , cells, molecular-genetic effects of cadmium chloride, 169
- , lymphocytes, radiosensitivity of chromosomes, 223
- N*-Hydroxy-2-acetylaminofluorene, in Chinese hamster cells, 263
- ICR-191, in CHO/HGPRT system, 91, 103
- Inactivation, of DNA repair, in frozen and thawed mammalian cells, 137
- Inhibitor-depleted, conidia, of *A. nidulans*, mutations to 2-thioxanthine resistance, by γ -irradiation, 21
- Interferon, virus-induced, molecular-genetic effects of cadmium chloride on, 169
- Intergeneric, mating, transfer of *polA* gene from *E. coli* to *S. typhimurium*, 351
- Intrasanguine, host-mediated assay, with *S. typhimurium*, 291
- Irradiation, γ , mutations to 2-thioxanthine resistance in inhibitor-depleted conidia of *A. nidulans*, 21
- , —, small doses, in stamen hairs of *Tradescantia* clones, 195
- , —, and UV, in auxotrophic strains of *S. typhimurium* carrying an R plasmid, 1
- , of sunlight and sunlamp, and fluorescent lights, in Chinese hamster ovary cells, 333
- , UV, inactivation of DNA repair in frozen and thawed mammalian cells, 137
- Irradiation, UV, (continued)
- , —, induction of ouabain-resistant Chinese hamster cells, influence of caffeine, 125
- , —, mutation from tryptophan auxotrophy in *E. coli*, and DNA polymerase I, 147
- , —, sensitive mutants, of *S. cerevisiae*, repair of pyrimidine dimers, 13
- , —, sister chromatid exchanges in xeroderma pigmentosum cells, 253
- , —, and X, in CHO/HGPRT system, 91, 103
- , X, and chemical mutagens, in blood lymphocytes of ataxia telangiectasia patients, 343
- , —, —, in mouse dictyate oocytes, 325
- , —, chromosomal radiosensitivity of lymphocytes from the chimpanzee, 69
- , —, cytological analysis of aberrations in *Drosophila*, 213
- , —, induced translocations, in somatic and germ cells of mice, dose-response relationship, 61
- , —, sensitivity of chromosomes of rabbit lymphocytes, 223
- Isopropylmethanesulphonate, and X-rays, in mouse dictyate oocytes, 325
- Kilham, virus, reproduction of, molecular-genetic effects of cadmium chloride, 169
- Larvae, of *Drosophila*, treated with methyl methanesulphonate, protective effect of caffeine, 41
- Lead, poisoning, in monkeys, chromosomal abnormalities in lymphocytes, 77
- Lethality, of fluorescent lights, sunlamp and sunlight irradiation in Chinese hamster cells, 333
- Lethals, mosaic, in different germ cell stages of *Drosophila*, by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 31
- Light, fluorescent, white, black and blue, in Chinese hamster cells, 333
- Locus, HGPRT, in Chinese hamster ovary cells, quantitative assay, 91, 103
- Lymphocytes, of blood, of patients with ataxia telangiectasia, effects of chemical mutagens and X-rays, 343
- , from the chimpanzee, chromosomal radiosensitivity of, 69
- , from monkeys, poisoned with lead, chromosomal abnormalities, 77
- , of rabbit, radiosensitivity of chromosomes, 223
- Lysine, independence, spontaneous mutability in *Saccharomyces*, 185

- Macaca irus*, chromosomal abnormalities in lymphocytes of animals poisoned with lead, 77
- Mammalian, cells, in culture, cytogenetic assays of chemical clastogens using, 233
- , —, frozen and thawed, inactivation of DNA repair in, 137
- , —, somatic, genetic origin of mutations, 271
- Mating, intergeneric, transfer of *polA* gene from *E. coli* to *S. typhimurium*, 351
- Metabolic, activation, sister chromatid exchanges in Chinese hamster cells by carcinogenic mutagens requiring, 263
- , conversion, of ethene, to ethene oxide, alkylation of haemoglobin after, 175
- Methylazoxymethanol acetate, effect on mutation frequencies in Chinese hamster cells, 153
- Methyl methanesulphonate, in CHO/HGPRT system, 91, 103
- , effect of caffeine on mutations in Chinese hamster cells, 157
- , protective effect of caffeine on *Drosophila* larvae treated with, 41
- N*-Methyl-*N'*-nitro-*N*-nitrosoguanidine, in CHO/HGPRT system, 91, 103
- , cytogenetic assays using mammalian cells in culture, 233
- , effect of tumour-promoting agents on mutation in Chinese hamster cells, 153
- , mosaic lethals in different germ cell stages of *Drosophila*, 31
- Micronucleus, test, cytogenetic findings in pernicious anaemia, 249
- Mitomycin C, effect of caffeine on mutations in Chinese hamster cells, 157
- , and X-rays, in ataxia telangiectasia patients, 343
- Molecular-genetic, effects, of cadmium chloride, 169
- Monkeys, chromosomal abnormalities in lymphocytes of animals treated with lead, 77
- Mosaic, lethals, in different germ cell stages of *Drosophila*, by *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, 31
- Mouse, dictyate oocytes, X-rays and chemical mutagens, 325
- , dose-response relationship for radiation-induced translocations in somatic and germ cells, 61
- , intrasanguine host-mediated assay with *S. typhimurium*, 291
- Mutability, spontaneous, in UV-sensitive strains of *Saccharomyces*, 185
- Mutagen, *N*-acetoxy-2-acetylaminofluorene, in Chinese hamster cells, 263
- Mutagen, (continued)
- , 2-acetylaminofluorene, in Chinese hamster cells, 263
- , acridine orange, cytogenetic assays, using mammalian cells, in culture, 233
- , acrylonitrile, in *E. coli*, 283
- , adriamycin, and X-rays, in ataxia telangiectasia patients, 343
- , aflatoxin B₁, in Chinese hamster cells, 263
- , —, and cytochrome P-450 in *Saccharomyces*, 309
- , alkylating agents, avaluation of genetic risks, 175
- , 2-aminofluorene, in Chinese hamster cells, 263
- , benz(a)pyrene, in Chinese hamster cells, 263
- , cadmium chloride molecular-genetic effects, 169
- , caffeine, effect on aberrations in Chinese hamster cells, 157
- , —, protective effect on *Drosophila* larvae, treated with methyl methanesulphonate, 41
- , —, and UV, in xeroderma pigmentosum cells, 253
- , —, and UV-induced ouabain-resistant Chinese hamster cells, 125
- , carcinogenic, requiring metabolic activation, in Chinese hamster cells, 263
- , chemical, and X-rays, in blood lymphocytes of ataxia telangiectasia patients, 343
- , cyanoethylene, in *E. coli*, 283
- , cyclophosphamide, and cytochrome P-450 in *Saccharomyces*, 309
- , —, intrasanguine host-mediated assay, 291
- , diethylnitrosamine, intrasanguine host-mediated assay, 291
- , diethyl sulphate, prolonging G₁ cell phase in barley seeds, 205
- , —, II-III translocations in mature sperm of *Drosophila*, 355
- , dimethylaminoazobenzene, intrasanguine host-mediated assay, 291
- , dimethylnitrosamine, in CHO/HGPRT system, 103
- , —, and cytochrome P-450 in *Saccharomyces*, 309
- , dimethylsulphate, effect of caffeine on mutations in Chinese hamster cells, 157
- , dimethylsulphoxide, and cytochrome P-450 in *Saccharomyces*, 309
- , endoxan, intrasanguine host-mediated assay, 291
- , ethene oxide, alkylation of haemoglobin after metabolic conversion of ethene to, 175

Mutagen (*continued*)

- , ethyl carbonate, and cytochrome P-450 in *Saccharomyces*, 309
 - , ethyl methanesulphonate, in Chinese hamster ovary cells, 271
 - , —, in CHO/HGPRT system, 91, 103
 - , —, effect of caffeine on mutations in Chinese hamster cells, 157
 - , —, intrasanguine host-mediated assay, 291
 - , —, and X-rays, in ataxia telangiectasia patient, 343
 - , *N*-hydroxy-2-acetylaminofluorene, in Chinese hamster cells, 263
 - , ICR-191, in CHO/HGPRT system, 91, 103
 - , isopropylmethanesulphonate, and X-rays, in mouse dictyate oocytes, 325
 - , lead, in monkeys, chromosomal abnormalities in lymphocytes, 77
 - , methyl methanesulphonate, in CHO/HGPRT system, 91, 103
 - , —, effect of caffeine on mutations in Chinese hamster cells, 157
 - , —, protective effect of caffeine on *Drosophila* larvae treated with, 41
 - , *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine, in CHO/HGPRT system, 91, 103
 - , —, cytogenetic assays using mammalian cells in culture, 233
 - , —, effect of tumour-promoting agents on mutation in Chinese hamster cells, 153
 - , —, mosaic lethals in different germ cell stages of *Drosophila*, 31
 - , mitomycin C, effect of caffeine on mutations in Chinese hamster cells, 157
 - , —, and X-rays, in ataxia telangiectasia patients, 343
 - , β -naphthylamine, and cytochrome P-450 in *Saccharomyces*, 309
 - , neutral red, cytogenetic assays, using mammalian cells in culture, 233
 - , 4-nitroquinoline 1-oxide, effect of caffeine on mutations in Chinese hamster cells, 157
 - , pro-, cytochrome P-450 and activation of, in *Saccharomyces*, 309
 - , procarbazine, in *Drosophila* mutational spectrum, 47
 - , quinacrine mustard, cytogenetic assays, using mammalian cells in culture, 233
 - , Simian virus 40, affinities in mutant HGPRT enzymes at different pH values, 111
 - , thiotepa, effect of caffeine on mutations in Chinese hamster cells, 157
 - , —, intrasanguine host-mediated assay, 291
 - , triethylenemelamine, in mouse dictyate oocyte, 325
- Mutagenesis, chemical, to purine analogue resistance in Chinese hamster cells, 271
- , spontaneous, and radiation-induced, in *S. typhimurium* strains carrying an R plasmid, 1
- Mutagenicity, of fluorescent lights, sunlamp and sunlight irradiation in Chinese hamster cells, 333
- Mutant, HGPRT enzymes, changes in substrate affinities in, at different pH values, SV40 mutagenesis, 111
- , of *S. cerevisiae*, sensitive to UV, repair of pyrimidine dimers, 13
- Mutation frequencies, somatic, in stamen hairs of *Tradescantia*, after gamma-rays, 195
- , —, effect of tumour-promoting agents on, in Chinese hamster cells, 153
 - , genetic origin of, in mammalian somatic cells, 271
 - , to 2-thioxanthine resistance in conidia of *A. nidulans*, by γ -irradiation, 21
- Mutational, spectrum, of procarbazine in *Drosophila*, 47
- β -Naphthylamine, and cytochrome P-450 in *Saccharomyces*, 309
- Neutral red, cytogenetic assays, using mammalian cells in culture, 233
- Nitrogen, or oxygen, mutations to 2-thioxanthine resistance in conidia of *A. nidulans*, by γ -irradiation, in presence of, 21
- 4-Nitroquinoline 1-oxide, effect of caffeine on mutations in Chinese hamster cells, 157
- Oncogenic, virus, reproduction of, molecular-genetic effects of cadmium chloride on, 169
- Oocytes, dictyate, of mouse, X-rays and chemical mutagens, 325
- Ouabain-resistant, Chinese hamster cells, UV-irradiated, influence of caffeine, 125
- Ovary, cells, of Chinese hamster, effects of ploidy level on mutagenesis, 271
- , —, —, irradiation with sunlight, sunlamp and fluorescent lights, 333
 - , —, —, quantitative assay of HGPRT locus, 91, 103
- Oxygen, or nitrogen, mutations to 2-thioxanthine resistance in conidia of *A. nidulans*, by γ -irradiation, in presence of, 21
- P-450, cytochrome, and activation of pro-mutagens in *Saccharomyces*, 309

- Pan troglodytes*, chromosomal radiosensitivity of lymphocytes, 69
- Pernicious, anaemia, cytogenetic findings, 249
- Phage, yield, during Weigle reactivation of bacteriophage lambda, 161
- Phorbol, effect on mutation frequencies in Chinese hamster cells, 153
- pH values, different, changes in substrate affinities in mutant HGPRT enzymes, SV40 mutagenesis, 111
- Plasmid, R, spontaneous and radiation-induced mutagenesis in auxotrophic strains of *S. typhimurium* carrying, 1
- Ploidy, level, effect of, on mutagenesis in Chinese hamster cells, 271
- Poisoning, with lead, in monkeys, chromosomal abnormalities in lymphocytes, 77
- Polymerase, I, of DNA, and UV-induced mutation from tryptophan auxotrophy in *E. coli*, 147
- Procarbazine, in *Drosophila*, mutational spectrum, 47
- Production, of phage, during W-reactivation of bacteriophage lambda, 161
- Prolonging, G₁ cell phase, after treatment with diethyl sulphate in barley, 205
- Promutagens, cytochrome P-450 and activation of, in *Saccharomyces*, 309
- Protective, effect, of caffeine, on *Drosophila* larvae, treated with methyl methanesulphonate, 41
- Protocol, for cytogenetic assays of chemical clastogens using mammalian cells in culture, 233
- Purine analogue resistance, mutagenesis to, in Chinese hamster cells, 271
- Puromycin, and inactivation of DNA repair in frozen and thawed mammalian cells, 137
- Pyrimidine, dimers, repair of, in radiation-sensitive mutants of *S. cerevisiae*, 13
- Quantitative, assay, at HGPRT locus in Chinese hamster ovary cells, 91, 103
- Quinacrine dihydrochloride, cytogenetic assays using mammalian cells in culture, 233
- Quinacrine mustard, cytogenetic assays, using mammalian cells in culture, 233
- Rabbit, lymphocytes, radiosensitivity of chromosomes, 223
- Radiosensitivity, chromosomal, of lymphocytes, from the chimpanzee, 69
- , —, —, of rabbit, 223
- Reactivation, Weigle, of bacteriophage lambda, phage yield during, 161
- Relationship, dose—response, for radiation-induced translocations in somatic and germ cells of mice, 61
- Repair, of DNA, inactivation of, in frozen and thawed mammalian cells, 137
- , of pyrimidine dimers, in radiation-sensitive mutants of *S. cerevisiae*, 13
- Resistance, to ouabain, in UV-irradiated Chinese hamster cells, influence of caffeine, 125
- , to purine analogue, mutagenesis to, in Chinese hamster cells, 271
- , to 2-thioxanthine, mutations to, in conidia of *A. nidulans*, by γ -irradiation, 21
- Root tips, of barley seeds, aberrations by diethyl sulphate, 205
- Saccharomyces cerevisiae*, comparison of genetic activity of aflatoxins, 7
- , cytochrome P-450 and activation of promutagens, 309
- , repair of pyrimidine dimers in radiation-sensitive mutants, 13
- , spontaneous mutability in UV-sensitive excision-defective strains, 185
- Salmonella typhimurium*, carrying an R plasmid, spontaneous and radiation-induced mutagenesis in auxotrophic strains, 1
- , intrasanguine host-mediated assay, 291
- , transfer of *polA* gene from *E. coli* to, 351
- Sanguine, intra-, host-mediated assay, with *S. typhimurium*, 291
- Seeds, of barley, aberrations by diethyl sulphate, 205
- Selection, stringency, effect of, on mutagenesis in Chinese hamster cells, 271
- Sensitive, mutants of *S. cerevisiae*, to irradiation, repair of pyrimidine dimers, 13
- , UV-, excision-defective strains of *Saccharomyces*, spontaneous metabolability, 185
- Simian virus 40, affinities in mutant HGPRT enzymes at different pH values, 111
- Sister chromatid exchanges, chemical mutagens and X-rays in blood lymphocytes of ataxia telangiectasia patients, 343
- , in Chinese hamster cells, by carcinogenic mutagens requiring metabolic activation, 263
- , in Down syndromes and normal human beings, 85
- , effect of caffeine on, in Chinese hamster cells, 157
- , in xeroderma pigmentosum cells after UV, 253
- Somatic, cells, mammalian, genetic origin of mutations, 271
- , —, of mice, dose—response relationship for radiation-induced translocations, 61

Somatic, (continued)

- , mutation frequencies, in stamen hairs of *Tradescantia*, after gamma-rays, 195
- Spectrum, mutational, of procarbazine, in *Drosophila*, 47
- Sperm, mature, of *Drosophila*, II–III translocations by diethylsulphate, 355
- Spermatocytes, I, of *Drosophila*, cytological analysis of X-ray-induced aberrations, 213
- Spontaneous, mutability, in UV-sensitive strains of *Saccharomyces*, 185
- , mutagenesis, in two strains of *S. typhimurium*, carrying an R plasmid, 1
- Stamen, hairs, of *Tradescantia*, somatic mutation after gamma-irradiation, 195
- Strains, auxotrophic, of *S. typhimurium*, spontaneous and radiation-induced mutagenesis, 1
- , UV-sensitive, excision-defective, of *Saccharomyces*, spontaneous mutability, 185
- Substrate, affinities, changes in, in mutant HGPRT enzymes at different pH values, SV40 mutagenesis, 111
- Sunlamp, and sunlight irradiation, in Chinese hamster cells, 333
- Syndromes, of Down, and normal human beings, sister chromatid exchanges, 85
- System, CHO/HGPRT, development and definition, 91, 103
- Test, micronucleus, cytogenetic findings in pernicious anaemia, 249
- 12-*O*-Tetradecanoylphorbol-13-acetate, effect on mutation frequencies in Chinese hamster cells, 153
- Thawed, mammalian cells, and frozen, inactivation of DNA repair, 137
- 6-Thioguanine, resistance to, mutagenesis to, in Chinese hamster ovary cells, 271
- Thiotepa, effect of caffeine on mutations in Chinese hamster cells, 157
- , intrasanguine host-mediated assay, 291
- 2-Thioxanthine, resistance, mutations to, in conidia of *A. nidulans*, by γ -irradiation, 21
- Tradescantia*, clones KU 9 and 20, somatic mutation in stamen hairs after gamma-rays, 195
- Transfer, of *polA* gene from *E. coli* to *S. typhimurium*, 351
- Translocation, II–III, by diethylsulphate, in mature sperm of *Drosophila*, 355
- , radiation-induced, in somatic and germ cells of mice, dose-response relationship, 61
- Triethylenemelamine, in mouse dictyate oocytes, 325
- Tryptophan, auxotrophy, mutation from, in *E. coli*, UV-induced, and DNA polymerase I, 147
- Tumour, -promoting agents, effect of, on mutation frequencies in Chinese hamster cells, 153
- UV-sensitive, excision-defective strains, of *Saccharomyces*, spontaneous mutability, 185
- Virus, Kulham, reproduction of, molecular-genetic effects of cadmium chloride, 169
- , oncogenic, reproduction of, molecular-genetic effects of cadmium chloride on, 169
- Weigle, reactivation, of bacteriophage lambda, phage yield during, 161
- Xeroderma pigmentosum, cells, sister chromatid exchanges after UV, 253
- Yeast, comparison of genetic activity of aflatoxins, 7
- , repair of pyrimidine dimers in radiation-sensitive mutants, 13
- , spontaneous mutability in UV-sensitive excision-defective strains, 185
